Assalamu’alaikum Wr. Wb.

University of Muhammadiyah Malang (UMM) is one of Indonesia leading universities by virtue of its advancement in the field of Information and Technology (IT). For the past ten years, UMM has developed hardware and software for use by its students, who use a web-based software provided by the university.

The library also uses a digital system which incorporates sophisticated hardware and software. Therefore, with an excellent staff and state of the art technology, UMM is committed to producing the best and brightest students in order to complete in the highly competitive global market.

Please accept my warmest welcome.

Wassalamu’alaikum Wr. Wb.

Rector

Muhadjir Effendy

UNIVERSITY PROFILE

University of Muhammadiyah Malang was founded in 1964, and now is one of the biggest private universities in East Java. This university has developed so rapidly that the Central Board of Muhammadiyah Organization entrusts it to supervise all Muhammadiyah higher education institutions in the Eastern parts of Indonesia. In addition, UMM has an outstanding reputation in education, research, and community services.

UMM has three campuses: Campus I is on Jl. Bandung, Campus II on Jl. Bendungan Sutami, and Campus III on Jl. Tlogomas, Malang. Campus I is presently used for Postgraduate Study and foreign language courses; Campus II houses the Medical Faculty and Diploma of Nursing, and Campus III is the main campus housing all other faculties with buildings harmoniously constructed and arranged in a beautiful landscape.
1. STUDENTS
Today, UMM educates more than 20,000 students coming from all parts of Indonesia and other countries, such as Malaysia, Singapore, Brunei Darussalam, Australia, USA, South Africa, Finland, Timor Leste, etc.

2. EDUCATION, RESEARCH, AND COMMUNITY SERVICES
UMM is also called the research university, in which both lecturers and students conduct a significant amount of research. As a consequence, the Ministry of Research and Technology of Republic of Indonesia entrusts UMM to be the center for the Right of Intellectual Creation in East Java.

3. UNITS AND CENTERS
To be active domestically and internationally, UMM has established several centers: The Research Center, Community Service Center, Language Center, and Culture Center. There are centers for Islamic and Philosophical Studies, Biotechnology, Women Studies, Population and Environment Studies, as well as centers for Computer, Internet, Library and Production.

4. RESEARCH CENTER
The Research Center is one of the centers which manage research activities. Its duty is not only to organize all types of research activities, but also to coordinate several study centers such as PSIF, Center of Women Study (PSWK), PSKL, Biotechnology Center, Technology and Science Development Center, and the Copyright Center. Research Center is also actively involved in developing human resources and other research activities. Research Center of University of Muhammadiyah Malang (UMM) has been successfully bridging the researchers and the various funding foundations. These include Directorate General of Higher Education, Kopertis, province and region governments in East Java, Ministry of Women Roles, and BK2KBN. For the last two years, the Research Center of UMM has gained the highest financial support from Higher Education Foundation. Research conducted by UMM lecturers has been published in research journals.

5. COMMUNITY SERVICE CENTER
The Community Service Center serves as a coordinator of community service activities conducted by either the lecturers or students. Some of these include Students Society Service (KKN), Entrepreneurship (KKU), and Education Program for Young Children, which is conducted along with Students Society Service (KKN). To implement its programs, Community Service Center has built a strong relationship with several government and private foundations, plus non-government organizations such as Regional Development Planning Board in East Java, Perum Jasa Tirta I Malang, JIPPR Asian Foundation, Directorate General of Higher Education, Labor Department, Department of National Education, PLS Jakarta and BAPENAS in East Java. Some programs developed from Community Service cooperation and the Department of Higher and National Education are MKU, KUU, KUK, Technology and Science, Vucer, KBPK, Sibermas.

6. LANGUAGE CENTER
The major function of Language Center is developing the teaching of English for Specific Purposes (ESP) - an English program that is held for 2 semesters. Students of UMM are required to join the English program based on their discipline. English for fun is another program conducted on Student Day which is aimed at providing students with opportunities to participate in some activities like speeches, debates, telling stories and experiences, language games, quizzes and jokes in English. In addition, this center has also published ESP textbooks and REFORM magazine to support its existence academically.

7. CULTURAL STUDIES CENTER
The Cultural Studies Center is one of the academic institutions that is responsible for cultural education, research and community services. The Cultural Study Center is founded as a center of culture in Malang and in East Java. It concentrates on the education field, research, community service and serves as the center of cultural information. The cultural study center conducts many scheduled activities like art performances, exhibitions, art education, discussions, seminars, art and culture analysis, cultural speeches, festivals, products and publications. The cultural center is also responsible for organizing events at UMM Dome.

8. PROFIT CENTER
UMM, as one of the Muhammadiyah foundation universities, is committed to be an Islamic university although its students are diverse in their religions. The existence of the great A.R. Fachruddin Mosque is the
proof of UMM's commitment to Islam development. This five-story mosque was officially inaugurated by the former President, Hебиб. The A.R Facruddin mosque is the proof that UMM provides religious services in educating our students. To maintain the mosque, UMM built UMM Dome which serves as a multi purpose building and sport center thereby generating profit. UMM also built a hotel for UMM academic activities which serves as another promising profit center.

9. INTERNATIONAL COOPERATION

Here is the list of International Cooperation of University of Muhammadiyah Malang (UMM):

1. Erasmus Mundus External Cooperation Window” (2009 - 2013)

   - University of Trento (Italy)
   - University of Innsbruck (Austria)
   - Dresden University of Technology (Germany)
   - Murcia University (Spain)
   - University of Kuopio (Finland)
   - Minho University (Portugal)
   - Atılım University (Turkey)
   - Global Education for European Engineers and Entrepreneurs (France)
   - University of Muhammadiyah Malang (Indonesia)
   - Mongol National University of Technology (Mongolia)
   - National University of Mongolia (Mongolia)
   - Hanoi University of Technology (Vietnam)

2. Asia Link Program

   Partner Universities include:
   - University of Muhammadiyah Malang (Indonesia)
   - Hunnan Normal University (China)
   - Murcia University (Spain)
   - Foggia University (Italy)

3. Australian Consortium In-Country Indonesian

   - The National University of Laos (Laos)
   - Universiti Sains Malaysia (Malaysia)
   - Asian Institute Technology (Thailand)
   - Burapha University (Thailand)
   - Hunan Normal University (China)
   - Jinlin University (China)

Studies (ACICS)

   The Consortium involves:
   - Australian National University (Australia)
   - Asia New Zealand Foundation (New Zealand)
   - Charles Darwin University (Australia)
   - Curtin University of Technology (Australia)
   - Deakin University (Australia)
   - Flinders University (Australia)
   - La Trobe University (Australia)
   - Leiden University (Australia)
   - Monash University (Australia)
   - Murdoch University (Australia)
   - SOAS (Uni of London) (UK)
   - University of Adelaide (Australia)
   - University of Melbourne (Australia)
   - University of New England (Australia)
   - University of New South Wales (Australia)
   - University of Queensland (Australia)
   - University of Sydney (Australia)
   - University of Tasmania (Australia)
   - University of Technology Sydney (Australia)
   - University of Western Australia (Australia)
   - University of Western Sydney (Australia)
   - University of Wollongong (Australia)

   Partner Universities include:
   - University of Muhammadiyah Malang (Indonesia)
   - Curtin University of Technology (Australia)
   - University of New England Armidale (Australia)
   - Pennsylvania State University (US)
   - Saudi Arabia Embassy in Indonesia Programs : a. Academic Exchanges b. Donation for Islamic References
   - Apex USA clan Oklahoma - USA Programs : Summer Jobs
   - Shimamura LLC - San Diego, California - USA Programs : Work and Travel
   - The University of Wisconsin - Madison - USA Programs : Academic Exchange
   - US Embassy in Indonesia Programs : American Corner at UMM
   - Aminif (American - Indonesian Exchange Foundation) - USA Programs : Education USA and Fulbright corner at UMM
   - Iran Embassy in Indonesia Programs : Iran Corner at UMM
   - Universiti Malaya - Malaysia Programs : Academic Exchanges
   - Universiti Kebangsaan Malaysia Programs : Academic Exchanges
   - Ohmene Hashim & Co., Bandar Wangsa - Malaysia Programs : Students’ Internship (Law Faculty)
   - Hanwha Corporation - Korea.
Programs: Research and Development on Methane Gas Catching
17. Chonnam National University - Gwangju, Korea Programs: Academic Exchanges
18. Indonesia and The Netherlands Higher Education Partnership Programs:
   a. Academic Exchanges
   b. Joint Research
   c. Establishment of Twinning Programs
   d. Institutional Development Programs
19. BGP Engineer and Delft University - Netherlands Programs: Solid Waste Management (research and Development)
20. Tilburg University - Netherlands Programs:
    a. Library management
    b. Teaching Learning Strategy
    c. Curriculum Development
    d. Management of Campus Café
    e. Exchange Programs
21. Utrecht University - Netherlands Programs:
    a. Library management
    b. Teaching Learning Strategy
    c. Curriculum Development
    d. Exchange Programs
22. Islamic University of Rotterdam - Netherlands Programs:
    a. Library management
    b. Teaching Learning Strategy
    c. Curriculum Development
    d. Seminar on Islam
23. Leeds University, UK Programs: Academic Exchanges
24. Almuassasah al Islamiyah Riyadh, Saudi Arabia Programs: Training for Ulemas and Teachers of Islam
25. United States Peace Corps, USA Programs:
    a. Training and Study of Indonesian Language and Culture
    b. English Teaching Method (Indonesian Contex)
26. Asia Moelens Charity Foundation - Qatar Programs: Arabic Language Training

10. INTERNATIONAL RELATIONS OFFICE
International Relations Office (IRO) is an office in UMM which has responsibilities to connect UMM with other parties, locally and internationally. Here are some responsibilities of IRO:
1. Handling international communications between UMM and foreign parties.
2. Searching and publishing any information related to scholarships, student exchange programs and others via website, billboard, banner, and flyers.
3. Building mutual relationships between UMM and other universities on both a local and international scale.
4. Organizing incoming and outgoing students and teaching staff.
5. Taking care of Passports and Visas.
6. Conducting national and international workshops and seminars.
In running the programs, IRO is handled by senior staff with positions such as:
   a. Head of IRO (Vice Rector for International Affairs)
   b. Assistant for Division of European and American Affairs
   c. Assistant for Division of Australia Affairs
   d. Assistant for Division of Middle East Affairs
In addition to the above, IRO also has several administrative staff with responsibilities to handle immigration matters, Erasmus Mundus, and Darmasiswa administration, web site maintenance, and general administrative matters.

PROFILES
Pattama Sritianrong (Thailand)

University of Muhammadiyah Malang is a very good place to study, because UMM locates in Malang, a city with complete facilities such as transportation, shopping centers, and tourism destinations. About lecturers, UMM has qualified lecturers. And, if UMM can manage all these potencies well, I am quite sure that UMM will develop much better than before.
STUDENT FACILITIES AND SERVICES

1. TUTORIAL ROOMS
All tutorial activities are conducted in rooms across three campuses. The tutorial rooms are well designed and equipped with a white board and overhead projectors. Each department has 3 multimedia rooms in which LCD projectors, slide projectors, video CD, and other audiovisual aids are linked to the Internet at Campus III. Tutorials are conducted in two-lift equipped big buildings.

2. LABORATORIES
All study programs have laboratories, in addition to those managed by the university, such as the Computer Lab, Language Lab, Physics Lab, Chemistry Lab, Biology Lab, and Biotechnology Lab. These labs are equipped with modern, high technological facilities. A sufficient amount of equipment makes it possible for each student to do an experiment individually or in small group. The language lab in particular, is used to prepare students with proficient English skills.

3. LIBRARY
It is located in the mosque. The libraries are computerized and digital. In the Digital Library, which is linked to Indonesian Digital Library Network, there are theses, dissertations, research reports, journals, bulletins, and multimedia resources. The site is www.digilibrary.ummm.ac.id

4. COMPUTER, INTRANET, AND INTERNET
Computers are provided in laboratories at all campuses. It is compulsory that all students take computer classes. To support the teaching and learning process, both the Intranet and Internet are equipped with servers, and fiber optic cables with adequate bandwidth. These are connected to all units at the three campuses. Thus, all academic activities are conducted by means of full IT equipment. An internet connection is compulsory for all UMM freshmen. They are provided with e-mail, mailing lists, and browsing facilities. UMM’s site is www.ummm.ac.id, and the contact address is webmaster@ummm.ac.id

5. ACADEMIC SERVICES
UMM provides students with many academic services, such as course consultations, tutorials, practicum, fieldwork, apprenticeship, social work, research, and thesis consultation. These services are under Vice Rector I, Administration Bureau, Vice Dean I, and Head of Department.
UMM academic services use a web based Academic Administration Management. This system has been applied for several years through upgrading and advancement, and it can be accessed rapidly with flexible ease. Therefore, students can program their course anywhere via ‘KRS on Line’.

6. SERVICES FOR STUDENTS
The services are under the Vice Rector III, Students Bureau, and Vice Dean III. The services provided are associated with non academic activities that include a number of student organizations, scholarships, medical services, canteens, counseling and religious services.

7. RELIGIOUS SERVICES
To increase understanding and implementation of Islam, UMM established a Mosque Managing Board to deal with the improvement of students ability in Al-Qur’an reading, Arabic, praying and tafsir.

8. MEDICAL SERVICES
Since health is a critical factor, UMM Health Service provides consultations to students free of charge. Professional medical practitioners are part of the UMM Health Service. Healthy canteens are provided with reasonable and affordable prices.

9. SCHOLARSHIPS
UMM, together with many fund providers such as SUPERSEMAR, PPA, BBM, BPM, JPS, PKPS-BBM, PLN, TPSDP, Djarum Company, and Toyota & Asto Company, awards excellent students scholarships. The scholarships monetary form real life or experiences, such as overseas summer jobs.
10. COUNSELING SERVICES
Psychological factors influence students’ success. To assist them solve their psychological problems, the Center for Guidance and Counseling is equipped with professional counselors.

11. BANKING SERVICES
All financial transactions, such as registration, tuition fees, practicum, and thesis examination, are conducted with banking services. UMM has partnerships with several banks, such as BNI, BCA, and Bank Jatim. Moreover, the existence of several Automated Transaction Machines (ATM) makes it easy for students to have transactions at anytime.

12. COMMUNICATION SERVICES
The UMM telecommunication shops and Internet shops enable students to have easy and rapid communication, both academically and personally.

13. INFORMATION AND CAREER
Almost all faculties have partnerships with several stakeholders, private companies in particular, at home or internationally. The university and/or faculties provide career consultation for alumni through programs such as New Business Incubator and Business and Job Placement Consultation. Faculties also give apprenticeships to students at several business centers. Some companies, however, entrust UMM to conduct recruitment for them.

14. STUDENTS’ PART TIME JOB
To equip students with work experience and financial support, final semester students are provided with a part time job for six months. This part time job is available in the library, laboratories, faculties, policlinics, micro teaching sector and UPT.

PROFILE
Fahru Rasyidi
(English Department Student)

"In my point of view, UMM is the most beautiful campus in Indonesia. Located near Brantas River and arranged in beautiful landscape, UMM is an invaluable asset. UMM belongs to the people of Malang, I have been aware of UMM since I was in senior high school because my friends and sister are studying there. Most people recommend me to study at UMM because of its modern facilities. UMM offers some scholarship awards and part-time jobs to support students financially. UMM also provides some programs to enrich students' knowledge like leadership and students exchange. I am so lucky to get the opportunity to work part-time in the international Relations Office."

STUDENT ACTIVITIES
1. STUDENT ORGANIZATION
UMM students do not only involve themselves in academic activities but they also personally develop themselves through organizational activities. In addition, they are trained to develop their leadership skills. Thus, they should be active both in intra and extra curricular activities. They can get involved in University Student Senate, Faculty Student Executive Board, Faculty Student Senate, and the Students Association Department. UMM also covers the student communities, such as Kalimantan Student Community, and the Sumatera Student Community.

2. UNIT OF STUDENTS ACTIVITY
The Student Activity Unit manages the development of students’ talents and interests in the arts and sports. Some students have involved in football, volleyball, basketball, self-defense, table-tennis, and badminton. Activities in the arts include music, dance, theater, and traditional music. There are other activities too, such as Boy Scouts, photography, cinematography, and journalism.

3. FACILITIES FOR RECREATIONAL ACTIVITIES
UMM prepares facilities to support students’ activities. Sports facilities are a football stadium, basketball and volleyball courts, and badminton. Arts have all electrical, acoustic, and traditional musical instruments. In addition, BESTARI tabloid, and other faculty newsletters are facilities for students to improve their writing. With these sufficient recreational facilities, many UMM students have joined and obtained great achievements in local, regional and national events.

4. TROPHIES AND AWARDS
Because there are good facilities and guidance, many UMM students have gained a number of awards in sports and arts both in regional and national events. In 2004, UMM students garnered the following honors: SCTV favorite presenter, second place finishes in a poetry writing contest, runner up of Peksiimina Theater in East Java, LKT national co-op, basketball championship, and a student was achieved a nomination at a film festival.
FACULTIES AND DEPARTMENTS

Here are some faculties and departments in University of Muhammadiyah Malang:

1. FACULTY OF ISLAMIC STUDIES
The Faculty of Islamic Studies consistently prepares its graduates to have integrity, a broad view, and achieve professionalism in its discipline. Thus, the following is expected of the students to be an expert in religion and a religious pioneer in society in Islamic education and Islamic law.

1.1. DEPARTMENT OF ISLAMIC EDUCATION (TARBIYAH)
This Department prepares its graduates to be experts in Islamic education and professional teachers. They will achieve additional skills, such as being a researcher, Islamic education consultant, and educational institution manager.

1.2. DEPARTMENT OF ISLAMIC LAW (SYARIAH)
This Department prepares its graduates to be experts in Islamic Law in Indonesia. Upon graduation, students work as religion judges, lawyers, researchers and educators.

1.3. EXCELLENCIES
Facing global demands, the Faculty of Islamic Studies incorporates Competency Based Curriculum with an emphasis on life skills. The programs developed are:
   a. Arabic (Diploma Certificate)
   b. English (Diploma Certificate)
   c. Preaching Endeavor (Dakwah) (speech skills and master of ceremony)
   d. Computer skills (with certificate)

1.4. INTERNATIONAL COOPERATION
To improve academic quality, this faculty has built relationships with universities in Egypt (Al-Azhar University and Minia University) and Saudi Arabia (Islamic University of Imam Muhammad Ibn Saud, and Saudi Arabian Government). The partnership is in the form of student and teacher exchange and scholarships.

1.5. OTHER SUPPORTS
The teaching and learning process in this faculty is supported by resources such as Arabic Language Lab, Computer Lab, Dakwah Communication Lab, and Telescope, used to determine the Islamic Calendar (Ruyah). This faculty is also equipped with an Islamic education library.

1.6. ISLAMIC LAW LABORATORIES
Islamic Law students are provided with laboratories and they conduct experiments, such as pilgrimage, corpse treatment, Islamic calendar determination, inheritance practicum, and religion justice. In addition, the Islamic Law Lab provides services that are open to public associated with religious consultation and Islamic Law.

1.7. TWINNING PROGRAM
This faculty, the Department of Islamic Law in particular, cooperates with the Law Faculty to have a twinning program (degrees in general law and Islamic law).

2. FACULTY OF ENGINEERING
This faculty was established in 1978, and has 5,687 graduates working in all parts of Indonesia, and in other countries. At present, there are 3,204 active students spreading out across Departments, each of which is equipped with sophisticated laboratories, including an Autocad Training Center (ATC), a computerized drawing training center. Graduates obtain Autocad certificates issued by Autodesk Int’l., Inc., Singapore. Students are also offered the opportunity to get scholarships as well. In the year of 2003, there were 552 students receiving scholarships from government and private institutions.

2.1. DEPARTMENT OF MECHANICAL ENGINEERING
Graduates of this faculty have been working in several famous companies, such as Caltex, Pertamina, Astra, United Tractor, Freepport, NewMont, Production Process Lab, Machine Inspection Lab, Metal Test Lab, CAD/ CAM/Planning Lab, and CNC Lab. There is also a center for Automotive Training, in cooperation with Yamaha.

2.2. DEPARTMENT OF CIVIL ENGINEERING
The graduates of this department work in planning consultation companies, or building construction companies (buildings, dams, irrigations, roads, bridges, etc.), and building management. There are five laboratories: a Soil Mechanic Lab, a Construction and Material Lab, Hydraulic Lab, Road Lab, and Geodesy Lab. Students can apprentice at UMM, or other consultant or contractor companies. Graduates are expected to be competitive, skillful, and professional.

2.3. DEPARTMENT OF ELECTRICAL ENGINEERING
The curriculum in this department is designed in such a way that it creates qualified Electrical Engineers. This department is also equipped with laboratories, such as a Basic Electronics Lab (including practicum of Electric Series, Electronics, Logic Series, Electric Measurement), a Skill Electronics Lab (including a practicum of Controlling Systems, Microprocessor, Industrial Electronics), Advanced Electronics Lab (including practicum of PLC, Electric Machine, and VHDL), and an Applied Computer and Electronic Workshop.

2.4. DEPARTMENT OF INDUSTRIAL TECHNOLOGY
In this department, students learn integrated aspects in complicated industries. The aim is to prepare graduates who have ability in analyzing, planning, and producing systems in industry that is more effective, efficient, productive, and optimal. Specifically, this department offers subjects to sharpen its students’ skills based on their talent and interest. Subjects are divided into three skill courses: Industrial Management, Manufacturing System, and Industrial System Planning. The laboratories supporting this department are: Computer and Statistical Lab, Production Process Lab, Working Plan and Analysis Lab, Production Control and Planning Lab, Industrial System Simulation Lab, and Manufacturing System Lab.

2.5. DEPARTMENT OF INFORMATION TECHNOLOGY
The Information Technology department aims at equipping its graduates with national curriculum support and intranet and internet laboratories, a software laboratory and an information laboratory. Job opportunities for graduates are a consultant in software development and software management, technology integration and development, and information and technology consultant.
3. FACULTY OF AGRICULTURE AND HUSBANDRY

All courses in this department are professionally designed to suit the demands of the industrial world and government. Supporting autonomy and globalization, all students of this faculty are equipped with English and Internet skills. There are also scholarships available from UMM, Toyota Astra, Supersemir, BKMI, and PPA.

3.1 DEPARTMENT OF AGRONOMY / AGRO-BIOTECHNOLOGY

AGRO-BIOTECHNOLOGY

This department helps students learn about modern agriculture, including biotechnology applications, organic agriculture, culture medium, horticulture, and landscape. Students are further prepared in production management skills and are supported with complete facilities. Organic products, edible mushrooms, and organic fertilizers are some business practices. Graduates of this department work on plantations in agricultural industries, and as research and agronomy consultants in both government and private companies.

3.2 DEPARTMENT OF AGROBUSINESS

This department produces professional agricultural entrepreneurs mastering agricultural techniques, that are capable of predicting economic profits and risks. Supporting facilities are laboratories and activities which encourage students to have field observations, plus apprenticeships in various institutions and companies. Graduates become researchers, consultants, and they work in government and on private plantations and in agricultural institutions and companies.

3.3 DEPARTMENT OF TECHNOLOGY FOR AGRICULTURAL PRODUCTS

This department has educational endeavors based on food industries, post harvest, nutrition and entrepreneurship. Graduates are expected to master basic and applied knowledge in raw material storage, processing, and treatment in order to produce quality agricultural products. Graduates also work in food processing industries, sanitation, and research.

3.4 DEPARTMENT OF FORESTRY

This department produces a competency based education system to prepare students with skills, knowledge and technology. To achieve this goal, the department has built bonds in the agricultural sectors with several universities in Indonesia.

3.5 ANIMAL HUSBANDRY DEPARTMENT

The graduates of this department are equipped with skills in animal husbandry that include on-farm and off-farm skills. The curriculum is designed to enable the students to have mastery in breeding, feeding, animal care management, disease treatment, post-harvest management, and marketing management. Using the back-to-farm learning approach, graduates of this department are expected to have both theoretical and practical skills. This department also provides complete facilities such as a Basic Science Laboratory and Skill Laboratory that consists of Animal Production Laboratory, Nutrition Laboratory, Technology of Animal and Fish Production Laboratory, Breeding and Animal Cultivation Laboratory, Animal Health Laboratory, Husbandry Social and Economy Laboratory, Experimental Farms, Language Laboratory, and Computer Laboratory. To support and increase their entrepreneurship skill, the students are also trained in business and production units. The job fields for the graduates of this department are, for examples, animal husbandry industries (animal feeding factories, commercial farms, and pharmaceutical factories), food technology industries, leather industries, food retail and franchise industries, business and banking consultants, government offices, and entrepreneurship. 90% of the alumni of this department have been employed in either government or private sectors, and some others have become successful entrepreneurs.

3.6 FISHERY DEPARTMENT

The Fishery Department goals are to produce experts in marine culture and fresh water fishery. This department also emphasizes developing fishery science and technology that can support government policy in optimizing marine development, coast management, and marine industry. The curriculum is focused on sciences and technology in the field of marine cultivation (fresh, brookish and seawater), catching, processing, coast resource management, and marine science and technology such as, breeding management, natural and artificial feeding, aqua engineering and cultivation development, fish disease, catching, GIS, technology of fishery product processing, quality control, coast resource management, marine economy and, banking and cooperation. Local curriculum also offers entrepreneurship and fishery agribusiness management. The department is provided with facilities to optimize the teaching and learning process. The facilities include in-door and out-door fish pools that are used for breeding and production, a Nutrition and Natural Feeding Laboratory, Reproduction Laboratory, Limnology Laboratory, Fish Disease Laboratory, GIS Laboratory, and Basic Science Laboratory. In addition, senior students who have English language competence can apply for summer jobs program for six months in the United States and Australia. Fishery Department also cooperates with partnerships with government institutions, private agencies, and companies that work in fishery and marine industries. This department has also built partnerships with the National Department of Marine and Fishery, and with the city of Malang in developing Sendeng Biru Beach as a water front city. It has also empowered economically the people who live in the coast area in conjunction with government of East
4. FACULTY OF PSYCHOLOGY
The Faculty of Psychology has six study programs: Industry and Business Psychology, Developmental & Educational Psychology, Clinical Psychology, Social Psychology, Psycho Diagnostic and Psychometric. In order to produce qualified graduates, some sophisticated labs are provided. In addition, Study Centres such as the Consultation Centre and Counselling and Guidance Centre are established to support the learning process. These centers provide services for the all of the academic community. This Faculty also establishes academic cooperation with some hospitals, mental health center, companies and school.

5. FACULTY OF SOCIAL AND POLITICAL SCIENCES
The Faculty of Political & Social Sciences has four departments: Sociology, Social Welfare, Governmental Science, and Communication.

5.1 DEPARTMENT OF INDUSTRIAL SOCIOLOGY
Industrial Sociology is established in order to contribute to the country's industrial development. The curriculum is designed in order to produce professional graduates who are able to link the society development and industrialization process in Indonesia. Some of the subjects offered in this department are: Industrial Management, Economic Sociology, Consumer Behaviour, Product Planning, Third World Industry, Human Resource Management and Industry Cooperation. The graduates of this department will also get a sociology teaching certificate.

5.2 DEPARTMENT OF SOCIAL WELFARE
The Social Welfare Department is established to prepare highly qualified social workers. There are three concentrations of social welfare that students can choose from: Medical Social Work, Correctional Therapy, and Community Development. The graduates of the Social Welfare Department work at private as well as government institutions, and as academic staff at educational institutions. Some of the offered subjects are: Basic Health, Introduction to Political Science, Social Policy and Planning, Society Development and Organization, Correctional Therapy, Human Behaviour and Environment and Criminology Social Psychology.

5.3 DEPARTMENT OF GOVERNMENTAL SCIENCE
This Department equips the students' comprehensive knowledge on the government system and public administration. The graduates are expected to have outstanding academic qualifications and skillful at this field. Students learn Indonesian Bureaucracy, Public Policy, Leaderships and Government Management Information.

5.4 DEPARTMENT OF COMMUNICATION
This Department is established to prepare qualified professionals in communication. Therefore, the curriculum is designed to fulfill the job market demands. The three concentrations in the department are: Public Relations, Journalism, and TV Production. Some teaching facilities include: Audio Visual Lab, Journalism Lab, Photography Lab, Advertising Lab, Multimedia Lab, Public Relation Lab and UMM FM Radio Broadcasting Station.
Since 1993 the Faculty of Social and Political Science has established an academic partnership with

Australian Consortium for Indonesian Studies (ACICIS). This Consortium consists of Australian Universities and the Department of Indonesian Study. Australian students study Indonesian culture at UMM under the sponsorship of this program.

5.5 DEPARTMENT OF INTERNATIONAL RELATIONS
Cooperation concentrates on Asian studies, mainly Central Asia, American studies, and International Islam Development. This department also helps students learn foreign languages.
6. Faculty of Teacher Training and Education
The Faculty of Teacher Training and Education (FTTE) has five Departments: Mathematics and Computation, Biology, Indonesian Literacy, English Education and Civic Law. This faculty offers a teaching certificate or AKTA.

6.1 DEPARTMENT OF MATHEMATICS AND COMPUTER
This department has been accredited by National Accreditation Body (BAN) of Indonesia. Its excellent program is also called "five in one", meaning that the students of this department will get a S1 Certificate, Teaching Certificate, English Diploma Certificate, Computer Diploma Certificate and Internet Certificate. Two competencies are the main goals of this department. They are competency in Mathematics which is focused on the material development and search, and the competency in computation which is focused on computer application. Teaching facilities of this department include: a Multimedia Computer Lab, Networking Computer Lab, Department Library, and Micro-Mechanics Lab.

6.2 DEPARTMENT OF BIOLOGY
Accredited status has been given to this department. Some of the departments' priorities are: academic professional development, teaching facilities development, and academic development, and academic partnerships development. The priorities are set up in order to reach the department's mission: to create qualified biologists, to prepare responsible and competent biologists and to generate dependable biologists. Teaching facilities include: Physiology Lab, Microbiology Lab, Food and Nutrition Lab, Ecology Lab, Computer Lab, and Micro-Mechanics Lab. Academic partnerships are established for students' practical training with KEPATI BLIP Wonosari-Wonosari, National Preservation Park Baluran and Menjul Matang, and Zoological Park of Wonokromo.

6.3 DEPARTMENT OF INDONESIAN LANGUAGE AND LITERATURE
This accredited department combines the national and local curriculum contents. Graduates take jobs such as teachers, linguists, librarians, journalists, presenters, artists and art observers. Responsibilities include implementing the curriculum based competences, providing students with theoretical and practical skills, journalism skills, developing teaching facilities, improving academic service, and building good relationships with the school board.

6.4 DEPARTMENT OF ENGLISH
This department prepares graduates who are capable of competing in the job market at a national and international level. The department curriculum includes English for Young Learners, Translation, American Studies, and Computer and Internet Skill. The English Department is the most popular department of the Faculty of Teacher Training and Education due to the excellent programs it endorses.

(1) Inviting native speakers from the United States of America, Australia, and Europe to teach speaking classes.
(2) Building academic partnerships with international universities and institutions.
(3) Providing scholarships for its best students, which are sponsored by ASTRA, DIARUM, Supersemar, JPS, PPM Muhamadiyah and DIKTI.
(4) Developing teaching facilities such as: an Interactive Language Lab, Computerized Language Lab, American Corner, Micro Teaching Room and Multimedia Room.

6.5 DEPARTMENT OF CIVICS
This department aims at producing capable and dependable graduates who have strong Islamic faith, a good attitude and who are knowledgeable with regard to civics and laws. To achieve these goals, this department combines theoretical and practical knowledge with a cross-disciplinary approach: the collaboration between the science of law, politics, history, citizenship, government, and moral education. Other disciplines such as English, Journalism, Computer Application and Internet technology are also given. Employment opportunities for Civic Department graduates are teachers or lecturers of Civics, politicians, education consultants, and election observers.

6.6 DEPARTMENT OF ELEMENTARY SCHOOL TEACHERS
This department was established in 2007. It is aimed to prepare qualified elementary school teachers with strong Islamic faith.

7. FACULTY OF ECONOMICS
The Faculty of Economics has three departments: Management, Accounting, and Economic and Developmental Study. This faculty also offers a Diploma in Finance and Banking.

7.1 DEPARTMENT OF MANAGEMENT
This department is established to produce graduates who are competent at managerial skills and who are able to face challenges. The curriculum is designed in relation to four concentrations: Finance Management, Human Resource Management, Marketing Management, and Operational Management. The teaching methodology promotes active and critical thinking such as problem solving, simulations, role playing that stimulates the students to engage in feasibility studies, budgeting, operational research and decision making theories.
7.2 DEPARTMENT OF ACCOUNTING
This department aims at producing highly competent graduates in controlling and analyzing company cost, both manually and computerized. The curriculum offers Finance Accounting, Management Accounting, Management Information Systems, Auditing, Management and Taxation Controlling Systems. Teaching practices are conducted in cooperation with service companies, trading companies, industrial companies, taxation companies, and auditing institutions.

7.3 DEPARTMENT OF ECONOMICS AND DEVELOPMENTAL STUDIES
This department prepares capable graduates who have good analysis skills of both macro and microeconomics and are able to solve the current economics problems. To answer these challenges, five concentrations are offered: 1) Finance and Banking; 2) International Business; 3) Regional Budget Management; 4) Industrial Economics; and 5) Economic Law. Teaching facilities include: Mini Bank, Statistic Lab, Stock Exchange Corner (BEX Jakarta), Export Import, English, and Internet. Graduates can apply for positions at banks, insurance corporations, leasing, money exchange companies, money malls, tax offices, finance departments, Universities, State Owned (GUMN) and Export-Import Companies.

7.4 DIPLOMA OF FINANCE AND BANKING
This program is established to produce professional graduates in finance and banking. Theoretical and practical knowledge of finance and banking are taught. The core curriculum consists of: Management of Capital Banks, Financial Report Analysis, Business Ethics, Bank Administration Systems, Bank Accounting and Auditing.

8. FACULTY OF LAW
The mission of this faculty is to generate graduates who are capable of solving legal problems in society. The students, therefore, do not only study basic legal theories but they also learn how to apply the right law regulations and constitutions to certain law cases. Business Law, Islamic Law, Civic and Public Administration Law, and Court Law and System courses are offered. An apprenticeship is part of the requirement for students to enhance their mastery of law. The faculty is provided with a law laboratory that consists of Law Consultation Service Centers, Law and Constitution Documentation Center, Center of Law Education and Training that is used for court session practices, and the Law Library. Employment opportunities for the graduates include law, education, politics, government, law enforcement and military law.

9. MEDICAL FACULTY
The Medical Faculty is the first offered by a private university in Malang. This faculty is built on the principle of proficient knowledge and strong medical ethics. The mission of this faculty is to prepare professional doctors who possess competent knowledge and skills, have exemplary behavior as well as expertise and competency in family and industrial medical treatment. The learning process is conducted by implementing Islamic values based on the Holy Koran and Hadist, medical science and technology, and commitment of public services.

10. FACULTY OF HEALTH
The Faculty of Health is newly established in UMM based on the Rector’s Letter of Assignment No.203/SK-ST/X/2007, September 4, 2007. It is to support and foster the existing programs: Diploma III of Nursing, Bachelor of Nursing, and Pharmacy.

Vision
To develop the Faculty of Health as an outstanding faculty in conducting the higher education on both scientific and technological aspects of health based on Islamic values.

Mission
To conduct education, teaching, research and community service to produce health practitioners who are professional with good ethics and personality for societal welfare.

10.1 DIPLOMA III OF NURSING
Diploma III of Nursing was established in 1993 based on the decree of Health Practitioners Education Center, Ministry of Health No. Hk.00.06.2.2.3.003, dated 16 August 2002. It is accredited A, the highest level of accreditation in conducting nursing education. This
program is supported by qualified teachers, 12 graduated from bachelor of nursing, 1 specialized on community nursing, and 1 specialized on maternity nursing. Diploma III of nursing is aimed at producing nursing practitioners with the following competences:

Starting from 2010, US Peace Corps resumed to serve in Indonesia in the sector of education by sending 20 volunteers. They were assigned as English teachers in Senior High Schools in some East Java cities. However, before their 2-years in service program, they had to join Pre Service Training. They got 3 training areas: Indonesian language, culture and teaching methods. These were done in collaboration with a selected local university. After reviewing about 50 universities in East Java, the University of Muhammadiyah Malang (UMM) was finally selected as a local partner university.
